Liquid Waste Management and Drainage Specialists

Since 1980 Wales Environmental Group has been dedicated to the effective waste management of liquids. The company also specialises in all aspects of drainage work, ranging from the smallest domestic drainage problems through to large/commercial contracts and maintenance programmes for a wide range of clients.

If you are already one of our customers you will know we offer a prompt service at a competitive price. We are proud to have worked with many of our customers for over thirty five years, providing them with economically advantageous and environmentally appropriate effluent disposal and drainage solutions.

At Wales Environmental we seek to determine and fully satisfy our customers requirements by setting ourselves the highest standards of service delivery. We are confident that our customers expectations will be surpassed at all times.

As sector leaders, we understand your individual waste management and drainage requirements, with the proven ability to deliver an efficient service that ensures compliance with all Environmental Legislation, satisfying your operational requirements within budget.

Our Specialised fleet of vehicles and plant will ensure that your waste is collected in a safe and efficient manner. The vehicle provided will be specific to your requirements. Selection will be determined by the nature of the waste, site access and operating conditions, required method of loading and volume for collection.

An ever evolving investment in the latest technologies ensures the best site equipment. Surveys and reports are also produced with full diagnostic recommendations and the highest quality imaging, allowing clients to make sound remedial decisions.

Quality and safety are our main concern. All engineers have been fully trained to meet the required standards. The company holds four Safety Schemes in Procurement (SSIP), CHAS, Constructionline, SMAS and SafeContractor together with the prestigious International Organisation for Standardisation (ISO) accreditations gaining ISO9001, ISO14001 and OHSAS18001.

We endeavour to remain a leader in best practice ensuring that we are the most economical and environmentally responsible provider of quality Waste Management Services.
